

I write to submit my strong opposition to this proposed bill which is an unadulterated disgrace.

While the proposed bill is devoid of any specificity, it is clear that one of the borders being contemplated for the re-installation of tolls would be the borders on Interstate 95 and the Merritt Parkway between Greenwich and Rye.

Do any of the legislators who have sponsored this bill have a clue as to the traffic congestion that already exists on both of these highways? Do any of the legislators who have sponsored this bill have a clue as to the economic impact that tolls would have on the middle and lower class families who use both of these roads to get to work? And do any of the legislators who have sponsored this bill have a clue as to the amount of pollution that would result from cars and trucks waiting in the long lines to pay the tolls?

Quite honestly, you would either have to be a clown to support this bill or totally indifferent to the voters who you were supposedly elected to represent if you voted in favor of it.

And if you are considering this bill as a means to reduce the budget deficit, here's another novel idea for consideration - try cutting your spending as families all across our state have to do on a daily basis so as to live within their means.
